### Transcript

Board of Studies NSW K–10 syllabuses in English, mathematics, science (incorporating science and technology K-6) and history, for the Australian Curriculum, will be available in September 2012. Support materials from the Board of Studies will be published from September to December 2012. The Department will produce a range of professional learning courses, teaching resources and an integrated communication strategy to support schools when implementing the new syllabuses.

Teachers will be able to familiarise themselves with syllabuses and support materials throughout 2013.

For Kindergarten to year 6, the English syllabus will be implemented from 2014.

Also in 2014, it will be optional for K-6 schools to implement mathematics and science and technology syllabuses.

From 2015, mathematics and science and technology syllabuses *will* be implemented. Implementation of the K-6 history syllabus will be optional from 2015, with full implementation of all K-6 syllabuses from the beginning of 2016. English, mathematics, science and history syllabuses will be implemented for years 7 and 9 from 2014. All of these syllabuses will then be implemented for years 8 and 10 from 2015.
