

## Planning HSIE and history syllabuses content K-6

The diagram below is a visual depiction of a sample distribution of the syllabus content for history and HSIE could be organised across a stage.

This representation is designed to assist in the thinking required to develop a school plan which integrates some aspects of history with the remaining strands of HSIE. The planning has been distributed across a 2 year cycle of 4 terms each. Schools will need to make individual decisions about the order of topics in the school plan to suit specific school contexts. The odd year/even year cycle may also be adjusted in a similar manner.

The HSIE history mapping below is a model which references the outcomes from the *History K-6 Syllabus* and HSIE K-6 outcomes from the *Cultures, Environments and Social Systems and Structures* strands.

This is a skeleton outline that still needs HSIE subject matter descriptions mapped to the outcomes and the history syllabus content for specific school topics.
