**Scenario :** The following error appears in the first phase of the F12 procedure as soon as it starts to load the WinPe pre-installation environment files. Error 0x800910007 may otherwise appear.

Possible Resolution:

1. Reboot and run **F12** as normal
2. Press the **F8** key at or before the first build dialogue box which should display a Command Prompt
3. Type **DISKPART** in this Command Prompt box then press Enter

    Next, type the following commands, pressing Enter after each:

    a. **select Disk 0**
    b. **clean**
    c. **create partition primary**
    d. **select partition 1**
    e. **active**
    f. **format fs=ntfs quick**
    g. **assign**

4. Reboot PC and run F12 and it should then complete as normal.
