# Creating a Prowise Presenter Site Licence

What is a Site Licence for?

Prowise Presenter software is now free for all users. This means you can use your account on any teaching display or device and have full use of all the features and unlimited storage of resources.

Choosing one account to be an 'Admin Account' will allow your school or centre to create shared folders just for your teachers, and control the level of access to different types of user. This will allow teachers to simply share resources, without the need for large emails, uploading and downloading or carrying USB drives!
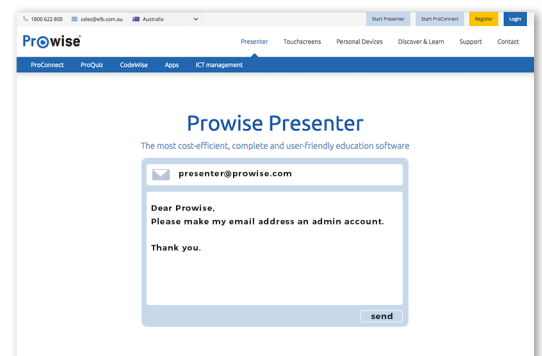

Step One: Create an Account

If you do not already have a Prowise Presenter account, simply go to the Prowise website **www.prowise.com/au** and click register. You will need to choose and email address for your administrator to use with this account.

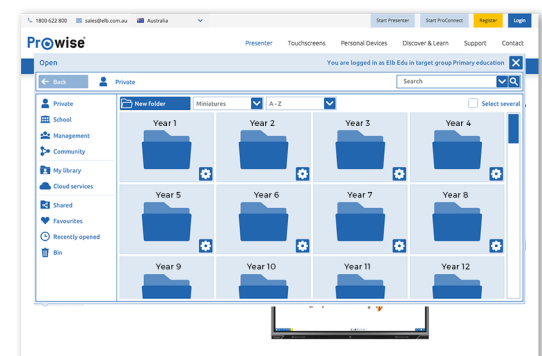

Step Two: Email Prowise

Once your Prowise Presenter account is set up, or you already have one, email **presenter@prowise.com** with your chosen admin email address and ask them to make this account an admin account and specify a rough number of users which you want to add. (There's no limit!).

Step Three: Email Confirmation

The Prowise Presenter team will email you once your account has been converted to an admin account, and you can now add users to your site licence. For more help on creating shared folders for your teachers, contact **training@elb.com.au**

Prowise Presenter

COMPLETELY FREE TEACHING SOFTWARE

Available on the **App Store**   Download for **Windows Phone**   GET IT ON **Google Play**
