

# Introducing VoiceThread

[VoiceThread](#) is an online media album that allows a group of people to make comments on images, videos, and documents. You can make comments using audio, webcam video or text.

Before using VoiceThread take a look at [What's a VoiceThread anyway?](#).

To get started:

- Select *Create*. If you don't have an account you will need to sign-up for one.
- *Upload* your content (eg your mind map from *Task 1*).
- Add an introductory or instructional *Comment* to each page.
- Select *Share* > *Get a Link* > *Copy the Link*. Share this link with your class.

With the free version of VoiceThread you can design **three** VoiceThreads, each consisting of up to **four pages**, per email account. You can edit these voicethreads as many times as you wish. Each VoiceThread can contain up to fifty **identities** so you might consider a class account. You can choose to make your VoiceThread public or private (recommended).
