

Rebuilding a Computer Using Software Centre

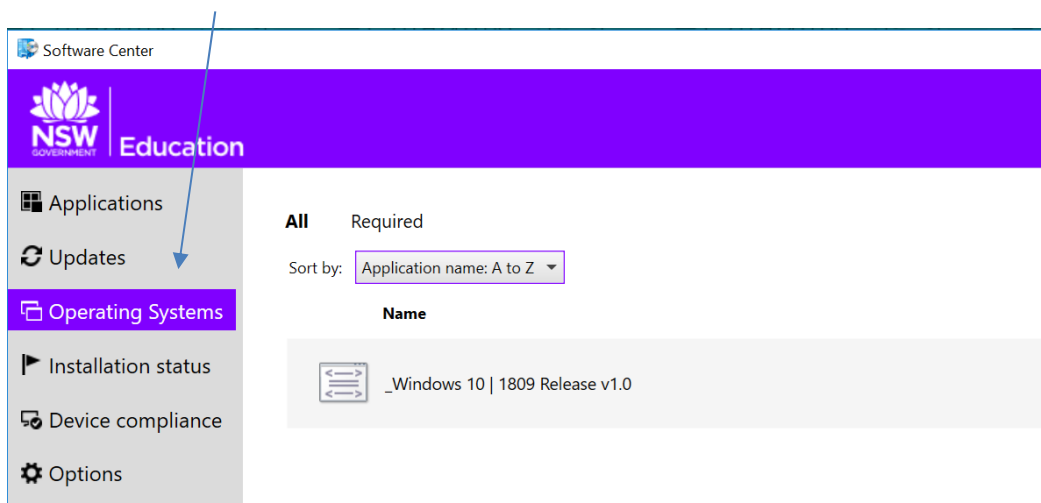

Constraints:

- User must have 'OS Management' Permissions granted through AMU → eT4L option
- Laptop devices must have power and an active Ethernet cable attached to complete the rebuild

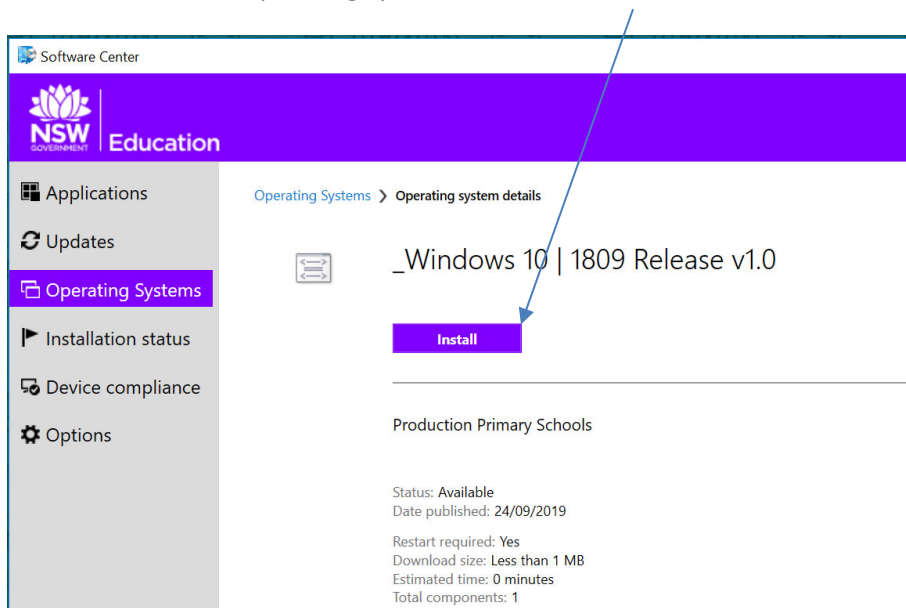

NOTE: This will remove all user data from the computer, users must backup their 'my documents' and 'desktop' files and folders first or they will be wiped over.

Process

- On the computer you wish to rebuild, from the Windows start menu select Microsoft System Centre → Software Centre
- Select 'Operating Systems' tab

- Choose the operating system and then Click on 'Install'

- Rebuild process will take about 5 minutes to prepare, you will need to confirm the rebuild and about 1.5 hours to fully complete
